WHEAT

The Season for sowing Spring Wheat is now approaching and a reminder to growers about the seed position is not untimely

There is no prospect of our being able to import any spring seed this

There is sufficient home-grown seed of spring varieties to meet all requirements but orders should be placed at once as delays are bound to occur if the ordering of seed is left to the last minute

Supplies of fertilisers should also be ordered and taken delivery of as soon as possible. This-will help manufacturers and merchants to provide every customer with his requirements in good time.

Issued by the Department of Agriculture.
