GRAIN GROWING IN 1949

This year farmers are FREE to make their own cropping arrangements

There will be no control whatever on the prices of oats or barley of the 1949 crop

Farmers who want a CASH crop should sow WHEAT or MALTING BARLEY

There is an UNLIMITED market for wheat at 62/6d a barrel for top quality

It is only farmers who have made a sale contract with Messrs Guinness or other industrial users who can be assured of a CASH market for malting barley

However, there is no better way of making a profit on surplus barley and oats than by feeding them to livestock and now is the time to set about increasing stock of pigs. poultry, cattle and sheep, so as to provide a profitable outlet for all the barley and oats surplus to commercial

requirements which may be produced this year Farmers who propose to grow barley for FEEDING should bear in mind that the newly introduced strong strawed varieties stand better and yield better than Spratt Archer on rich soils The best of these strong strawed varieties are Ymer and Kenia
