men could work and live in security His problem was no easy one as Dungarvan in common with many other Irish towns at the time was facing its leanest period Trade had fallen away, industries had collapsed The late Dr. Casey had been watching tiese had developments with grave concern and he knew perhaps, better than anyone else the pathetic effect knew the cause of their sickness Walsh and above all he knew their only cure

He was resolved to lift his nometown out of the depths of misery to the heights of pro-Lyons OSA do gress and prosperity He called together a number of his friends, including Rev T B Waish BA, P.P. St Patricks Waterford (then CC Dungarman is falling

Reginald Dickens, England and the late Mr Joe Moloney Dungarvan who was at the time one of the town's leading industrialists Together they planned an industrial revolution for the town of Dungarvan and within very short time had created the Dickens Leather Go giving employment to many of those so much in need of it In time this industry became one of the lead-

ing ones of its kind and during the war years proved a major asset to the boot and shoe trade of the nation The late Dr Casey's interest in the advancement of this industry was go great that his

good use all the waste materials from the leather factory he decided on the establishment of of its kind in the whole of Ire-land giving employment to many more He was Chairman and Managing Director of both companies Working as Dungar van's physician and industrial leader Dr Casey's efforts were soon successful and his homesoon successful and his home-town soon became a booming Mrs W F O Shea Cork (sis-business town once again ter) Mrs Percie Casey Dr C business town once again
As President of the Dungarvan Swimming Club he was instrumental in securing for the
town one of the finest swimming pools in the country. He was associated with everything that had for its object the advance-ment of Dungarvan and right up to the time of his death he was making every effort to help

As a supporter of G.A.A activities Dr Casey had few equals and although to quote his own words "I have never any time to spare to see the games I would love to see" he still took a very keen interest in all activities Some years ago he presented a massive silver cup together with the following Gaels for Juvenile Hurling Competition, Co Waterford

FARMERS !

Farmers are earnestly requested to consider the prospects for animal feeding stuffs

The whole livestock industry depends on the supply of feeding stuffs, and the only certain source of supply is our own land The continued expansion of the livestock industry

depends entirely on whether the farmers of Ireland produce the food necessary on their own land. If the farmers want to do their part, they can per

If they don't do their part, either our livestock (cattle, sheep, pigs and fowl) must be cut down in numbers or the whole system of letting farmers run their own business be ended. Compulsory tillage and all other forms of arbitrary

interference with the freedom of farmers were abolished by your Government The Government depends on farmers to do in their own interest all that is necssary, without compulsion or

To produce feed for our own livestock we require this spring AT LEAST the following .-Ymer Barley 200,000 acres Oats 800,000 Potatoes 400,000 Hay and Silage 2,000,000

Preparation for these crops must be undertaken NOW, m addition to such other crops as farmers may intend to sow, such as wheat, industrial barley, beet and other root crops Unless each farmer produces on his own land all

the animal feed he requires, he cannot hope to maintain his livestock It is for the farmers to decide whether

freedom or compulsion is the better policy In a statement early m 1950 the Minister for Agriculture directed the attention of farmers to the

prospect of supplies of feeding grains from abroad

becoming scarce and dear The prospect of supplies of feeding grain from abroad is worse since the Korean war and this makes it all the more necessary that we should produce all the oats, barley, potatoes and silage that our land can be made to yield in 1951, over and above such other crops as farmers have planned to grow.
