5th March, 1952 150% Dividend Per Annum

DOUBLE YOUR MONEY IN 8 MONTHS

Field trials carried out over a number of years indicate that where wheat is grown after lea or stubble an extra 51 cwts of grain may be expected to result from a dressing of 1 cwt of Sulphate of Ammonia, 3 cwts Superphosphate (35%) and 1 cwt of Muriate of Potash per statute acre. At present prices the cost of this dressing would be about £4 2 6, while the value of the extra grain would be £8 5. Assuming that the money expended on fertilisers is locked up for 8 months the dividend works out at 150% per annum. This is surely a good investment. Grow as big an area of wheat as you can and manure it as well as you can

A fault which it seems they can t cure I admit that it's lovely to look But its works and not looks that appeal 1

And so were beginning to wonder If ve have not got a raw deal It was bought almost two years To tell the time to the country

ard town But so far the only thing it has done
Is to let the poor ratepayers down

Within Lismore Town and the country around A silence now r igns supreme the New Town Clock has stopped once again st like the New Just Scheme

Already it cost us a nice bit of And that's why we want some But it only seems able to go or

Each time the Commissioners adjourn Its predecessor served many long years In-the good old days of yore nd even when burning although set on fire It struck for to warn Lismore But here is a fact that I m sure

If the new clock is set on fire It will not strike for to warn Even that it's not able to do

So now were all asking each other What the outcome is going to But we ll just have to walt and kep wondering How much more twill cost you

So here I must end my tsad With a bit of advice for you all, If you want the right time buy a watch for yourself The New Clock won't tell you - at all
