SAVE YOUR CHILDREN FROM **DIPHTHERIA** 

WHAT DIPHTHERIA IS-

Diphtheria is a dangerous infection which causes great loss of life amongst children from the age of 9 months

The disease generally starts in the throat or nose and the poison formed there gets into the blood, the poison may cause overruled the Council death in a few days, or if the child recovers it may leave him/her with a weakened heart, damaged kidneys and/or paralysis

Dipththeria is practically painless, therefore children do not complain in the very early stages, when treatment is of most first he said use and consequently the result is very often serious, if not fatal
