PARENTS!

SAVE YOUR CHILDREN FROM DIPHTHERIA

WHAT DIPHTHERIA IS-

Diphtheria is a dangerous infection which causes great loss of life amongst children from the age of 9 months

The disease generally starts in the throat or nose and the poison formed there gets into the blood the poison may cause death in a few days or if the child recovers it may leave him/hei with a weakened heart, damaged kidneys and/or paralysis

Dipththeria is practically painless, therefore children do not complain in the very early stages when treatment is of most use and consequently the result is very often serious if not fatal.

DIPHTHERIA PROTECTION IS ABSOLUTELY

Young children are not upset by the treatment No serious or lasting ill-effects arise as a result

HAVE YOUR CHILDREN PROTECTED-

Immunisation Clinics are held monthly in your local Dispensary Treatment is free for all Full particulars may be obtained from your local Medical Officer

No child will be given the course of treatment under the Scheme until the parent of guardian has first given his/her consent in writing on the prescribed form procurable at the Dispensary

PARENTS ARE ADVISED-

Land Distribution tracks of ranch lands are being acquired by the Land Commis-sion in the Youghal Killeagh and Castlemartyr parishes the Irish Land Commission is interesting to note that appliholders and farmers sons are being considered as suitable applicants, who are resident in the respective neighbourhood and not applicants from other counties In Castlemartyr district over 1,000 acres are available which is almost running into wilderness not being cultivated for many years
