GRASS SILAGE FOR YOUR STOCK

Silage making is easy when you watch the following points:-

1 Leafy grass and clover make the best silage cut early for good quality

Fill the silo to a depth of 3 to 4 feet the day you

Let a day or two pass for this filling to heat up to

the desirable temperature—which is body heat Now fill in day after day, until the silo is filled

Shake out each forkful-loads dumped in the silo cause mouldy patches—and trample well Young Leafy grass packs easily, so do not trample this as much as you would trample stemmy grass

Fill the silo slowly if you are dealing with rich young herbage in wet weather molasses can be a help in these conditions Fill quickly and pack well if the grass is stemmy or the weather is warm and dry

Finish the silo by sealing off and putting on some type of covering to throw off the rain.

IF YOU ARE MAKING SILAGE FOR THE FIRST TIME OR IF YOU HAVE ANY PROBLEM BE SURE TO CONSULT YOUR INSTRUCTOR IN AGRICULTURE
