

DUNGARVAN U.D.C.

CONNECTIONS AT ABBEYSIDE SEWERAGE SCHEME

TRADERS DEPUTATION BEFORE MEETING

CALL TO RESTRICT TRADING OF HAWKERS

Mr. T. Lannen, Chairman, presided at the fortnightly meeting of Dungarvan Urban District Council, held on last Friday night. Messrs P. A. Casey, M. J. Keane, T. Kyne, T. D. Lee, and R. Walsh, were also present.

Messrs P. Walsh, Borough Engineer, and E. Deery, Town Clerk, were in attendance.

Abbeyside Sewerage Scheme. Messrs O'Brien Contractors, Abbeyside, and Mr. M. Finan, B.E., came before the meeting to raise points concerning the sewerage extension being laid along the New Line, Abbeyside.

Acting as spokesman for the deputation, Mr. Finan referred to a meeting held on the 6th May last when this matter was discussed and at which the question of putting down manholes arose. He said that at that time, Mr. Walsh, the Engineer, had stated that there was no need for manholes as connections would be left in the main sewer.

Mr. Finan went on to say that on 12th July, plans were submitted by Mr. O'Brien showing the layout of the houses he intended to erect at New Line and setting out the points at which the connections should be left on the main pipe. These connections had never been put in and this would mean that Mr. O'Brien would now have to excavate to a depth of eight feet to make a connection to the main sewer. He stated that this would mean an additional cost of £20 or £30 in respect of each house to open the cut to lay a four-inch pipe, break the main pipe and make the connection. Such a procedure he said was bad from any point of view.

To a question by the Chairman Mr. Finan said that the main sewer pipes had now been laid and covered and no connections had been left for any of the houses.

Mr. Lee—This was very over-seeing on the part of our engineer not to have left these connections or manholes.

Chairman—He means the area of laying that sewer out there was to allow these houses to be connected up.

Mr. Finan—The original idea was to have a pipe at the back of the houses connecting up in one manhole to the main sewer.

Chairman—The consulting engineer wouldn't allow that.

Mr. Finan—I know, but the attitude of the Council towards Mr. O'Brien, is not co-operative to say the least. One connection was left on the pipe for every individual. Who that is I can't say as it's none of my business but I'm only stating that fact. If the connections had been left in the pipe as agreed the extra cost for the lot would be covered by a ten pound note.

Mr. E. O'Brien said that the Contractor's Engineer had stated that he was instructed to leave only one connection in the pipe.

Mr. Kyne referring to the separate connections asked if it was not correct that Mr. O'Brien had submitted a plan to show where he wanted the connections made in the main pipe.

Mr. Finan—Yes, the plan is there.

Mr. Kyne—And an Engineer reading it would know where to leave those connections.

Mr. Finan—Yes.

Mr. Kyne—I just want to be clear on that.

Mr. Keane—The owners of the houses in occupation there now are taking a serious objection to any proposal to move in and interfere with their pathways and garages to connect up with this sewer. I think the whole thing is an ill-considered affair.

The Chairman informed Mr. Keane that it had been decided at the conference at which this matter was first discussed that separate connections would have to be made in respect of each house.

Mr. Finan—When the main pipe was being laid and it was seen that the connections were not being put in, Mr. O'Brien asked the Contractor's Engineer who told him that there was nothing in the specification covering these connections.

Mr. O'Brien then said that if he did not get these connections he would stop building and pointing out that he had erected a big number of houses in the town he added that he had not got co-operation from the officials.

The deputation then withdrew.

The Council then proceeded to discuss the matter and Mr. Lee said that it was not fair that the connections were not left in the main pipe.

Mr. Walsh, Engineer, was then asked for his comments on the matter and stated that Mr. O'Brien had previously stated that he would continue to build houses at this site as long only as he had purchasers for them. That did not mean that he would complete the full scheme as submitted, and he said that it was usual engineering practice in the case of such speculative building to leave out connections for every house proposed to be built. The offsets, he went on to say, had not been put in so as to allow for the speedy testing of the pipe laid, but offsets would be put in for every house which had been built or which was actually in the course of construction.

With regard to the point made by Mr. Finan that the breaking of the pipe to make later connections might lead to a serious break in the sewer, Mr. Walsh

work quickly. However, when carrying out these repairs, care should be taken to ensure that the hawkers should not be allowed on the Square and said that they should be put down on the Quay.

Mr. Keane—Well now we have heard many a sidelight about the hawkers, and I think we should adopt this Act.

GROUND LIMESTONE

RECORD SALES

QUALITY

SERVICE

Deliveries from our Ballybeg and Killough plants during September broke all previous records for any month. More farmers are finding that they cannot afford to miss the increased yields and healthier stock produced on lime-enriched land.

In the area first supplied by our Ballybeg plant alone, there have now been established 18 other Ground Limestone plants and our deliveries are now limited to a radius of 40 miles. But our sales are greater than ever. There is every indication that the Spring demand will exceed even our output which is the biggest in Ireland.

Our quarries were selected after test and examination of almost every limestone deposit in Cork and many in Limerick, Tipperary and Waterford. Our production is tested each day to maintain the best proportion of particles of each size and is analysed for chemical composition in our Laboratories.

We deliver anywhere within 40 miles, even over very difficult routes. We spread almost everywhere with robust and efficient mechanical spreaders designed for cross-country work with front and rear axles driven. Most of these spreaders are now equipped with twin rear wheels to reduce further the bearing pressure on the soil. Our accredited spreading agents are equipped with efficient tractor spreaders. (We are open to consider applications for appointment as spreading agents in a few areas).

Our Ballybeg plant will supply, during winter and spring only, a mixture of Ground Limestone, Gafsa and Potash or Ground Limestone, Fertiphos and Potash mixed in 30-ton lots in correct proportions to suit your land.

Because of the support of the farmers, our price is the lowest we know of in any country in the world. While other prices and costs have increased, Irish farmers can lime their land cheaper to-day than their ancestors could when wages were 6d a day.

from Professor A. O'Rahilly, U.C. "On the eve of relinquishing office, I would like to say farewell and to send my thanks and best wishes for the future of those who have co-operated in this movement of educational progress. We worked together in this pioneer scheme which is probably the most important educational development in our time. The Vocational Education teachers with the full concurrence of the local committees displayed not only efficiency, but enthusiasm. And the students themselves—farmers, trade unionists, businessmen, countrywomen—responded beyond all expectation. Obviously there was a latent demand for such guidance and help. If the scheme continues, there is hope that we shall have an educated, capable local leaders especially in rural districts. Already there are one T.D. and two Senators who hold a Diploma. Before departure I personally thank all those teachers, and taught, who have so earnestly worked together and who always welcomed my visits. I wish them every success and I commend myself to their prayers."

On the proposal of Mr. Walsh, it was agreed that the letter be inserted in the minutes. Mr. Walsh added that Professor O'Rahilly was a fine type of layman and a credit to this country.

Mr. O'Faolain proposed that the Committee send their best wishes to Professor O'Rahilly who, he said, as President of U.C.C. had been a great man for the students and who had improved the College out of all knowing.

An Fear Mor said that as the founder of the Rural Courses they should be all grateful to Professor O'Rahilly.

Senator Butler—He brought the University to the people. Institutional Management. A letter from the Principal, College of Domestic Science, Cathedral Brugha Street, Dublin, stated that as a result of the recent interview the scholar-

at Cappoquin and Lismore. He had found the vehicle of the Lismore Hotel (in respect of which the lowest tender was received) eminently suitable for the purpose and this had also been passed by the Superintendent at Lismore. He added that the owner had been instructed to apply to the Department of Education for the necessary permit to carry the additional number of students and he had submitted a full report on the matter himself. He had also been on the phone with the Department but the matter was still held up in Dublin. He stated that the difficulty seemed to be that while such permits had been granted in respect of primary and secondary education there was no precedent in the case of Vocational Education. He had however received an assurance that the permit would be made available within the next week or so.

Mr. Walsh and Mr. Leahy said they hoped there would not be much further delay as time was passing.

Mr. Keane—Well now we have heard many a sidelight about the hawkers, and I think we should adopt this Act. However, when carrying out these repairs, care should be taken to ensure that the hawkers should not be allowed on the Square and said that they should be put down on the Quay.
