It is immaterial whether a relife is immaterial whether a reli power than the other as an elected member and popularity at the polls does not always reflect the ability of the candidates in the realms of Local

Administration Short of the most cogent reasons therefore, an elected member of a Council should take his seat and keep faith with those who elected him, and even though that number might not be overwhelming, his moral gers and Kilrossanty as thousobligations to them are nonthe-less important or pressing don to the pitch to "chair"

less important or pressing
My comments on this matter prompted by a discussion a. the last meeting of the Urban Council which could or could not

have to await instructions from the better—twas just a toss up played a drawn game. It was once by the upright the better—twas just a toss up played a drawn game. It was once by the upright the would be only too pleased to be tween them (3) The great man against man with fair in the second half about four the would follow. I am of opinion however, that they will not be the best off, and the way the Brickeys and the best fifteen were to win the ball over the many tackling minutes from full-time he put the ball over the ball over

The Electric Pressure Storage Water Pump Prices from £35-10 0

increases Milk Production

When Rural Electrification came to the Golden Vale Con O Riordan was one of the first to have it installed in his area. Con has a 100 acre farm in East Limerick and he keeps a dairy herd of up to 40 cows Even before electricity came he had built new stalls but cleaning and the maintenance of water supplies. proved a laborious job

One of Con's first purchases was an electric pump and now he says "cleaning is no longer a problem. We can hose out the stalls in a few minutes." and thanks to the plentiful supply of water, milk production has increased by more than 10%

Con also invested in a grain grinder and now grinds his own corn for feeding He saves a fair bit of money on this operation. His cows get freshly ground feed and the experts say that this is the best and most nutritive. Con says, "I think the experts are right, because my herd is flourishing on it." The milking plant is of course electrically operated

The O'Riordan's have four children, three boys and a girl Mrs O'Riordan, prepares all their meals on her electric cooker and smiles happily when she compares its easy working with her previous labours stoking the range

She also has a washing machine and an electric kettle and she says electricity that has emancipated women not an Act of Parliament

The intelligent application of electricity to their own special needs has done much to improve the standard of living of the O Riordan family Electricity can do the same for you. Why not fill in the coupon and send for the free leaflets on any appliances in which you are interested

SHORTAGE OF PHOSPHATE in their food may be one of the causes, it occurs frequently If they chew RAGS and BONES, if they are LAME and in POOR CONDITION, it is most likely due to SHORTAGE OF PHOSPHATE. Overcome this by applying PHOSPHATIC MANURE to the land they graze or by giving them an APPROVED MINERAL MIXTURE for CATTLE.

IRISH TREASURE

The Book of Kells is probably the greatest of our national treasures. This beautiful example of the art of Ireland dating from the 8th century has never been surpassed for the inventiveness of its unknown artists, its wealth of colour and the harmony of its design and caligraphy. Some of the pages are worked with such exquisite draughtsmanship and variation of pattern that they must have taken years to complete. First among the illustrated manuscripts of the world, this Irish treasure can be seen in the library of Trinity College, Dublin
