This bowl with the signs of the Zodiac was found among the mysterious ruins of Zimbabwe. Massive walls, in places thirty five feet high and etxteen feet thick, form the Acropolis—and also the Elliptical Temple, where every part is rounded without hard angles or corners. The abandoned city stands beneath the blazing African sun, a reminder of a great building people.

A place of enchantment, A city of dreams. Somewhere waiting to be found... in some far ocean or lost deep in a tropical jungle. Fifty thousand pounds could help you to find the city of your dramp.
