DISPOSAL OF LIQUID WASTES

WASTES

Many systems set up at milk plants to dispose of liquid wastes by irrigation have failed because of lack of information on which to base the design of these systems. The limiting factor in mose casts is the capacity of the soil to absorb liquid. To overcome the difficulty, the Institute has designed equipment which will permit routine measurements of infiltration capacity thereby providing information on the suitability of soils for absorbing liquid wastes.

THOSE CHRISTMAS

To the Editor of Dungarean Leader Dear Sir — Mr. Jackie Fahey, T.D., Parliamentary Secretary of the Minister for Agriculture and

T.D., Parliamentary Secretary in the Minister for Agriculture and Fisheries, published a letter in your edition of the 26/12/1970 about his Christmas cards.

Mr. Fahey decided not to send even one personal card this year.

Normally one might sympathics with a predicament which many of us shared, thanks to the staggering increases in postage charges. However, Mr. Fahey stated that he did send "official" cards to a limited mailing list—staff of the Department of Agriculture and Fisheries, etc., etc.

How many? Perhaps 2,000 or even 2,500? According to official sources the muniber was 25,000.

Yours faithfully,
PATRICK QUIRKE,
Chairman, Cabir Branch,
