101) RIAN REGAINS SENIOR ON RIAN REGAINS SERIOR TITLE AS KINSALEBEG TAKE FIRST SENIOR TITLE

The Waterford Senior Cross Cou in Championship was held at Lis nore on Sunday over a very fire? I make course in bitterly od but fine conditions. This was the first time that the datance was 7½ miles for the champon on in the county and low well all the athletes stated the extra 1½ mlies. There was 3 200d field but there were a lot of familiar faces missing for some reason

The lace was_a great duel first between R Barron G Deegan D Brown and T Ryan for 2 miles when Barron made a break dhe managed to shake off Brown and Deegan but Ryan followed and traped in book and traped in boo followed and tucked in behind Barron lap after lap and one wondered had Tony had enough races behind him in his comeback effort to remain with Barron As it turned out Tony was the one with all the answe when he gave his famous kick with 300 yards to go and Barron thad no answer to h m

And so Tony regained the senior title which he won two years ago and which he did not defend last year due to exams so well done to Tony and to Rodger for making such a good race and for keeping the goodared crowd guessing to the end
The race for team prize was
as good as over after 4 miles as K nsalebeg athletes had moved up the field thanks to the efforts of R Walsh and T Shaline who were running just 25 strong at the end of the race and this is what we have come to expect from these dedicated athletes who have made a clean sweep of all team titles in the

what of the rest of the athletes? Ger Deegan, the defending champion was showing the effects of his recent injury and he found the going too hard on this occasion but all credit to him for finishing John Barry, the great veteran from Lismore had to borrow some gear to make up a team as John had had the flu during the week, and yet he ran a sound race What a great sportsman John and what an example to many rounger athletes who ran on

Mr Denis O'Hara has some illuminating ideas for Irish industry.

If Denis were to think about it at all he would probably say he was a firstclass fuel efficiency expert The coke burning in his brazier provides heat to warm him, power to boil water for his tea and light for him to read by One source of energy—three functions That to Denis is fuel efficiency and energy utilisation at its best And it is-for Denis's purposes But there's still tremendous heat loss For Denis this doesn't matter For industry such a loss could be crucial

Are you making full use of the fuel consumed by your plant and machinery? The Government are offering generous grants to help you find out and to do

something about it if you re not A 50% grant towards the cost of a conservation survey of your premises

Up to 35% of the capital cost of carrying out modifications or improvements to your building or equipment which will result in worthwhile energy savings

A 50% grant towards individual research and development projects aimed at conserving energy in your manufacturing process You could get up to £15,000 for each separate project

Investment in energy conservation will be of lasting benefit to you—and to the national economy. Think about it Then ring The Industrial Development Authority at Waterford 051-3576 about grants
