bays made it extremeflicult for cars to back them without causing uction and then sending out on incorrect sides of vain traffic flow

thans by the time the ing operation for the e comes round to being again the authorities will taken another hard look e pattern and accept that vox populi as now exad could be correct

anna one of the disans on this topic which I ne involved in during the week, my attention was drawn to the continuing y danger which exists at irrand Side junction at so many other things I referred to this on preoccasions but even at sk of becoming a bore I again draw attention to langers that abound at junction particularly as is pedestrians are con-

spite the 30 mile speed that operates within the boundary motorists apthis junction on both of the main road at speeds than those perd and elderly people and en are exposed to s hazards as they risk perilous crossing The eason of the fact that a deal of double and even parking occurs quite to the junction while at n times of the day huge alated vehicles pull up at sides of the roadway thus the dearway for

know that the solution to problem as it exists at point at present is no one and I know too, that one which the Engineers been applying themfor some considerable so far without success ever we had problems in past at Tarits Bridge at shall Road junction and at ake (Quill's) all of which now been solved satiscelly Perhaps it will not actory decision in regard is point at Abbeyside will be made
