7th June you'll be voting for the first time ever in the European Parliament elections

180,000,000 others are due to do likewise because up to now the European Parliament has been appointed by the National Parliaments But this year for the first time, its 410 members will be directly elected by the people of the EEC

When you think of what the Parliament does you realise why these elections are so important. There are 410 members, divided not into national groups, but into political groups, so the 15 Irish members split-up according to their political philosophies

By joining with others, their point of view gains

Any new legislation must be debated in public by the Parliament before it can be passed by the Council of Ministers It also debates how much money should be given by the different Funds and
