heen given the name "the Dutch Disease."

Prof. Neary is concerned that sconomic poticles be implemented which would diffuse the benefits of an oil find throughout the economy and over time so that eyeryone in both present and fature generations would gain. In practice there is no guarantee that this will happen without careful planning. The issue, over his how the energial control of the profits of the profits as the profits and over his how the energial profits as should be spent. The available options are: retirement of existing national debit reductions in taxallors and increases in public spending. The spending increases should be concentrated on intrastructures, such as roads and communications: considerations from the profits of the profit
