Dungarvan Parish.
NEW CEMETERY FOR TOWN.
CARRIGLEA SCHOOL.
On Sunday last after last Mass a meeting of the Parish Committee was held in the Rectory of the Parish Church, Dungarvan, to consider the question of purchasing an addition to the present cemetery as also other parochial purposes. Very Rev. Canon F. P. Furlong, P.P., V.F., presided, and there were also present—Rev. P. F. McGrath, C.C.; Dr. J. C. Hackett, Messrs. Thomas Power, Denis Ryan, J. B. Dwyer, Thomas Flynn, James; John Christopher; W. Morrissey; Bailynanagore; Thomas Flynn, Colin-gour; R. Seahan, J. A. Lynch, Thomas Foley, W. O'Meara and T. Murphy, Parish Clerk.
The Very Rev. Chairman explained that some years ago the late lamented Right Rev. Monsignor Power had made arrangements to purchase from the owner of the plot of land adjoining the present cemetery, but the matter was left in abeyance pending the completion of the fee-simple title by the vendor. He need not impress on the meeting the urgent necessity that existed for that addition to the cemetery in view of the fact that the existing burial space was nearly all used up. Secondly, there was the question of erecting screens at each side of the High Altar in uniformity with the architecture of the Church. That was a matter on which he had been approached by His Lordship the Bishop, who was very anxious that it should be done, and when in town a few days ago he discussed it with him (Canon Furlong) and with his characteristic generosity said he would give £50 as a native of the parish for that particular work. On Friday last he received from His Lordship a cheque for £50 as promised, which had been lodged in the bank on deposit. And then there was the question of providing a school for Carriglea, which was badly needed, as Mr. Walsh wanted to get back the house he had given them in which the school was at present, and something was required to be done now.
Messrs. W. O'Meara and T. Murphy were appointed hon. sec.
Mr. Thomas Power said he was the owner of the plot adjoining the present cemetery which it was proposed to acquire. The area of two plots it was now held from the Land Commission at the annuity of 16/3, and when vested the annuity would be reduced to about 15/-. A few years ago the place was put up for public auction by him, and at the sale it was reserved for the late Monsignor Power at £140, and considering the terms on which it was held, he thought it was a reasonable figure. The area of the plot would be about 14 acres. This is a matter of pressing necessity as land must be got somewhere as all the available space in the present cemetery is taken up. Mr. E. A. Ryan, solicitor, is acting for me, and you agree to purchase this plot I will give every assistance to the proposal.
Chairman—Now that you have heard Mr. Power's statement what have you got to say? It is a most convenient piece of ground for a cemetery, and it is a question of the cost. The sum offered for it seems to me to be reasonable and fair.
Mr. Dwyer—What is the area of the new part of the existing cemetery?
Mr. Morrissey—I don't know. We could get that of the Ordnance map.
Mr. Dwyer—The last cemetery filled up very quickly. It is there for 30 years.
Mr. Morrissey—Having purchased this plot the question would arise of how to get into it?
Chairman—In the course of time you should take down the wall there at present and build a wall around the new plot. In the meantime an opening could be made to enable people to go through the present cemetery to the proposed plot.
Mr. Power said if the place—the new cemetery and the proposed plot—were all one it would be ideal. The probable cost of removing the wall at the lower end of the existing cemetery and re-erecting it at the end of the new plot would be about £50.
Chairman—Are you prepared to take this plot?
Dr. Hackett—It has got to be done.
Mr. Power said it was knocked down at the auction in reserve for the late Monsignor Power for £140.
The committee were unanimous that the price be £140.
As to taking down the wall at the lower end of the existing cemetery and re-erecting it below the new plot.
Mr. Flynn said it would be better to do that, and be moved that they do so.
Mr. Power agreed and said if the wall were left as at present people would have a sentimental objection to go to the new plot. As to the side walls of the new plot, Mr. Power said they could be built of concrete, and the existing walls there could be saved in the building.
Mr. Dwyer suggested that they have an estimate of the cost of walling it in all round as it would be well for them to know the cost of the whole work completed.
Mr. Ryan—Would the fact of getting an estimate prevent us from acquiring the site and going ahead with the work?

Chairman—I want to get a rough idea of the amount of money we will have to face.
Mr. Dwyer—That is my point, too.
Mr. Ryan—We should get estimates from people concerned as to the cost, and these estimates could be considered at the next meeting.
Mr. Flynn—I move that we buy the ground to-day and before removing the wall we have estimates for some considered at a subsequent meeting.
Mr. Dwyer seconded the proposition.
Mr. Christopher—In order to get estimates you should have a competent engineer to draw up a specification.
Mr. Ryan—I propose we agree to the purchase of the plot and that we also agree to the removal of the wall and its erection at the other side.
Mr. Flynn—Regardless of the cost.
Mr. Ryan—That will come up afterwards.
Chairman—There is no urgency about the wall and it can wait until we get plans and estimates.
Mr. Ryan—Some objection may be raised to the cost of the wall, and delay on that account may be fatal. Not to remove the wall would be detrimental to the taking of plots.
The Chairman said they would have an estimate for the next meeting.
Mr. Christopher proposed that Mr. Power, B.E., be appointed to prepare plans and specifications with a view to getting estimates for the removal of the present wall and the proper enclosing of the new plot.
Mr. Dwyer seconded.
Chairman—Mr. Power is a very good and very capable man.
The resolution was passed unanimously.
SCREENS FOR CHURCH.
With regard to the providing screens for the Parish Church between the High Altar and the side altars, the Chairman said it would cost at least £500 to put up copper screens. It would mean putting up carved oak screens with nice Gothic tracings in harmony with the architecture of the church, and he did not think they could be erected for less than £500.
Mr. Christopher—£500 seems an enormous amount for a small work.
Chairman—Look at the work of it is. The screens in the Cathedral, Waterford, cost over £400, and at the time of their erection before the war wages were low and materials cheap.
Mr. Dwyer—There was a question about that before, and Mr. Ashlin, the architect, was down about it.
Mr. Power—There are two very urgent items—the cemetery and the school at Carriglea. These are two pressing items, and could not we tackle them first and deal with the screens afterwards and not make the three demands on the town together?
Chairman—As to the school, I think the Education Board should subscribe two-thirds of the amount, but from what I have learned recently it is very difficult to get money out of them, and it is doubtful if we would get any money for the school from the Government. The renovation of the old school, draining, etc., would cost £500 or £600. As to the screens, His Lordship the Bishop is very anxious about it, but if he is informed that it is the wish of the committee to defer it for some time, His Lordship will, I am sure, be agreeable.
Mr. Dwyer—We should also have an estimate of the cost of the screens.
Chairman—We must have an architect who would give us a design and an estimate of the cost of the work.
Mr. Power—And also we should get the architect's fee lest there would be trouble later on.
Mr. Dwyer—As regards the school at Carriglea, I think a formal application should be made to the Board of Works for a loan for the purpose. It appears extraordinary if they will not give a loan for the building of a school. This would be a good time to apply for it.
Mr. Power—I would be inclined to ask His Lordship what he would sell the school for before coming to any conclusion on the matter, and having had his reply we could consider it.
Chairman—As a Dungarvan man he (Mr. Hackett) should treat us generously.
Mr. Christopher—The greater part of the cost should be levied on the townlands involved.
Dr. Hackett—From the health point of view this school is lying on the edge of the lake and it was a question to consider if that was a place to spend money upon.
Chairman—I heard from the teacher (Miss Hayes) that Mr. Williams, of the Board of Works, was there and inspected the place. If the cost of renovation is as much as that of a new school I would be in favour of the new school.
Mr. Power—Is there an offer of a site from any local people?
Dr. Hackett said of course he had not examined the site of the old school from the health point of view.
Chairman—I will send to the Education Office for a copy of the report made by Mr. Williams, Inspector.
Mr. Power proposed a hearty vote of thanks to His Lordship the Bishop for having so generously contributed £50 towards the erection of screens in the Parish Church.
Mr. Dwyer seconded.

How a Dungarvan Lady Became Archduchess of Austria.
ARCHDUKE JOHN'S AFFAIRES DE COEUR IN THE OLD BORO'.
A romantic chapter in the history of an Austrian Archduke who renounced his titles and decorations and went to sea in a cargo boat, is contained in the story of a Dungarvan lady now residing at Southampton, who claims she married the Archduke at Liverpool and is now entitled to his estates.
Living in Southampton is an Irish woman, Mrs. Katharine Tuppen, who declares that her husband, an Austrian sailor, who died there in 1916, was no other than the missing Archduke sailorman. 50 years ago the Archduke Johann, then General in command of the armies of Bosnia and Herzegovina, quarrelled with the Emperor Francis Joseph, renounced his titles and decorations, and set out to roam the world as plain John Orth, skipper of the cargo boat "Margherita," with a fascinating dancer, Emilie Stibel, whom he married in Vienna, he set sail for Liverpool round Cape Horn. From the moment the "Margherita" made dipped below the horizon on that voyage she was never seen or heard of again. Again and again John Orth was visited to have been seen and recognised in various parts of the world, and some years ago it was suggested he was alive and living in England.
Now Mrs. Tuppen declares that John Orth was never lost at sea, but that he married her at Liverpool and became the father of her 14 children. Mrs. Tuppen is now 70 years old, and so firm is her belief that her husband was the Archduke John that she is taking steps to establish her claim to his estates in Gmunden. To a newspaper representative she said last week—"I am convinced that he was the missing Archduke. Though he never said so in so many words, he often declared that if he had his rights his sons would be Duke and occupy great positions in Austria. I know he wrote several letters to Emperor Francis Joseph and he often talked of his home in Gmunden and hinted there had been a great family tragedy. When he died in 1916 he told me to write to the Dowager Queen of Spain and tell her, 'John is dead.' If I did that he said 'I would get my rights.'"
THE ARCHDUKE IN DUNGARVAN.
Mrs. Tuppen's remarkable meeting with the supposed Archduke was at Dungarvan, Co. Waterford, where she then lived with her parents, who carried on a small bakery business. "We met at a party," she said, "and it was a case of love at first sight. He was a very handsome man with fine eyes and black hair. No one knew where he came from, but it was obvious he was a man of refinement and considerable social attainments. He said he was a sailor and had just returned from a long voyage. The following day he proposed, but his parents were very much against the marriage because of the obvious difference in our social positions. My father said: 'He is evidently a man of culture and you'd be better advised to look out for a man of your own class.' But the man who called himself Tuppen would not be refused in Dungarvan, and eventually he was retained in St. Augustine's Catholic Church, Liverpool.
MRS. TUPPEN'S SISTER INTERVIEWED.
The Mrs. Tuppen, who claims the estates of the Archduke John of Austria, was born in Main street, Dungarvan, where her father was a well-known citizen. Her maiden name was Katherine McGrath, and she is a sister of Mrs. Slincy, who lives at Mary street here.
John Tuppen (the Archduke) came to Dungarvan with the late Patk. Power, U.D.C., Mary street, when paid off the ship on which both were sailors. They were great friends and Tuppen stayed with Mr. Power in Dungarvan for some time. It was then he fell in love with Katherine McGrath, who was a charming and attractive young girl. Mr. Patk. Power (junior), Mary street, Dungarvan, formed our representative that he knew Mr. Tuppen well and immediately recognised him when shown his photo. The many friends in Dungarvan of Mrs. Tuppen hope she will succeed in establishing her claim to the Gmunden Estates in Austria.
Distinguished Visitor—Mr. J. Whelan Delaney, the newly-appointed Free State Trade Representative in Britain, paid a visit to the Shandon Dairy, Dungarvan, during the week.
Chairman—In answering the Bishop's letter forwarding his cheque, I thanked him for his kindness first in the name of the parishioners and secondly in the name of the clergy of the parish.
The meeting then ended.

Co. Board of Public Health.
A meeting of the above was held on Tuesday last at the Courthouse, Dungarvan. Mr. Patrick O'Gorman, chairman, presided. Also present were—Messrs. J. Butler, T.D.; J. G. Duke, J. O'Donnell, P.T.; J. McAniffe, D. Conway, W. Stack, R. Delaney.
SYMPATHY.
The Chairman said before they go on with the ordinary business he would propose the following—"That we, the members of the Waterford Board of Health, express our deep and sincere sympathy to our colleague, Mr. J. Kiersey, at the untimely death of his beloved wife, and also to his young family, at the loss of their dear mother."
Mr. Duke seconded.
The Chairman proposed, and Mr. O'Donnell seconded—"That we desire to convey to Mr. Ward, Co. Co., our greatest sympathy for the loss he has sustained by the death of his son."
The Secretary, on behalf of the officials, wished to be associated with the resolutions.
The resolutions were passed in silence.
TRAMWAY S.S.O.
James F. Bogen was appointed to discharge the duties of sanitary sub-officer for the Tramway district.
COTTAGE RENT COLLECTOR SUSPENDED.
Mr. John Power, collector of cottage rents in the Clonmel area, who was asked for an explanation by the board re one receipt, instead of giving the information required, wrote "bankum" across the letter and returned it.
The Secretary explained that notices were issued to all tenants in the county asking them to send in their receipts. One man sent in a receipt from Clonmel area which the Secretary asked an explanation about.
Mr. Power proposed that the man be suspended. He had treated this board with contempt. He was sorry to say the Board of Health had some of the worst officials in the county.
The proposition was passed.
ARMORE WATER SUPPLY.
A letter was read from the inhabitants of Armore re the necessity of a water supply, and pointing out the growing population of Armore as a seaside resort.
A deputation from Armore came before the meeting in connection with the matter.
Rev. Fr. Power said the object was to try and improve the sanitary arrangements of Armore. There had been a dearth of drinking water. With the number of visitors coming to Armore the people were getting afraid of an outbreak of sickness. The matter if agreed to, would be one for the engineer to report on.
Dr. Foley said they had no water supply and no sewerage. The sewerage was being arranged by cesspools and there was danger of percolation through the houses.
Chairman—You will understand that this will be a local charge. This board will be only too willing to do anything they can in the matter.
Secretary—They have sanctioned the engineers now and you can refer it to them.
Mr. Conway—As regards the area of charge, that will make a thorny question. As representative for the district he proposed that the engineer be requested to prepare a report as to the cost of improving the present water supply and sewerage system.
Mr. Butler, according, said he was well acquainted with Armore and the arrangements were primitive. He thought the board would get a long term loan for the work if applied for.
Mr. Delaney said it would be well when getting in the report to get full cost of the work and also maintenance charges, which are a big item in other supplies.
Mr. Conway asked would not Armore be entitled to a Public Health Committee.
Secretary—The Public Health Committee have really no power. Everything they do is subject to this board.
Mr. Conway—Suppose there was a committee there could they not spend the water if anything went wrong?
A member of the deputation spoke of the usefulness of having a Public Health Committee for the district to prevent the dumping of ashes, bottles, etc., over the cliffs.
Mr. Conway's proposition was then put and carried.
Secretary—The analyst's report on the Armore water, a sample of which was sent by Dr. Foley, is in the correspondence which is to be dealt with. The report states that in his opinion the present water is suffering from sewerage contamination and is not fit for domestic use.
On the proposition of Mr. Conway, the board decided to get the pipe leading from the reservoir scored, so that an ample supply for domestic use could be got from that source pending the engineer's report.

badly needed repairs.
Mr. Stack thought the rent collector should be required to give a list of all cottages requiring repairs in his district.
The board agreed that all applications for repairs made to the Secretary should be sent direct to the engineer by him in the first instance, and not wait to bring it before a meeting of the board.
RING WATER SUPPLY.
Mr. Dwyer, B.E., reported that the present supply was not near completion as it was open to cattle, etc. The pipe line was not yet finished as regards valves. His opinion was that another spring should be let into the reservoir at a cost of about £20, so the supply at present would not be adequate in a few years. He submitted an estimate for the completion of the work at a cost of £400.
Mr. Stack—Is that report from Mr. Bowen? It is a good one.
Mr. Conway—In connection with that the people there are quite satisfied with the supply. All they want is to have it made secure and finished. He appreciated Mr. Bowen's report, as he knew Mr. Bowen wanted to have everything done in a thorough manner.
Chairman—We will refer it to our own engineer now to complete the scheme by concreting and protecting the reservoir.
ENGINEERS TO THE BOARD.
The Department wrote approving of the appointment of Mr. Jephson and Mr. Murphy as engineers to the Boards of Health and Public Assistance. The Department also wrote approving of the appointment of Mr. Quinn as cottage rent collector for the Carrick rural district.
John McGrath, B.S., applied for salary as engineer to the board from 1st May to 30th September.
Mr. Conway asked what amount of work was carried out in the Dungarvan rental district for the period. He proposed the application be deferred until next meeting and that the Secretary get an account of the work done.
Secretary—You passed it for the previous 9 months subject to sanction.
After further discussion the application was passed subject to sanction.
INCREASE OF POUNDAGE.
Mr. Hickey, Carrick-on-Suir, applied for an increase of poundage on the amount of cottage rents collected by him from 7 1/2 per cent. to 12 1/2 per cent. The present amount would not suffice to pay his hire.
Mr. Hickey explained when he took over the collection there was a sum of £400 outstanding. That amount was paid reduced to £206. An increase to 10 per cent. was granted.
APPOINTMENT OF SOLICITOR TO THE BOARD.
On the proposition of Mr. Conway, seconded by Mr. McAniffe, Mr. J. V. O'Gorman, Lisimore, was appointed solicitor to the Board of Public Health.
LIGHTING CAPPOQUIN.
The following tenders were received for the lighting of the lamps in Cappoquin—L. Heffernan, 5s. per month; Patk. Dineen, 4s. per month; — Downey, 4s. 10s. per month.
Secretary—Mr. Heffernan does not intend to supply oil, etc., at that price.
The tender of Patk. Dineen was accepted.
COTTAGE REPAIRS.
Only a very small number of tenders were received for repairs to cottages in the county, and in the majority of cases (the tenders being higher than the estimates) were not accepted. The matter of repairs was referred to the two engineers to attend to.
ADDITIONAL ROOM TO COTTAGE.
Mr. Stack moved the following notice of motion standing in his name—"That an additional room be built to the house occupied by David Kieley, Island, Stradbally." Passed.

WHIST DRIVE.
The first of the series of Whist Drives which the members of the Rowing Club intend to run on every Sunday night in future was held in the Boathouse Hall on last Sunday night and was well attended. The first prize for ladies was won by Miss Travers, teacher, Convent of Mercy Schools, while Messrs. Thos. F. O'Leary and Richard Glasse tied for first prize in the gentlemen's class, but on a cut of the cards Mr. Glasse was declared the winner. Those Sunday night Whist Drives, in the absence of dances, are bound to prove very popular during the coming winter.
LAST WEEK'S FAIR.
The usual monthly fair held on Thursday, 7th inst., was one of the best held for the past year. Buyers from the Counties Cork, Tipperary and Waterford, were present in large numbers, and with supplies of cattle large, in practically all departments, a brisk trade was done in the cattle line, but business was very slack in the sheep department, where there was a noticeable slump in prices with a consequent decline in sales. Ten waggon loads of first-class cattle were despatched from the railway station to various destinations, while a large number of valuable animals were also purchased by local butchers and dealers. The following is the list of prices which prevailed—Dropped calves realised from 50s. to 55s.; year and a half cattle, 45s. to 48s.; store cattle, 41s. to 43s.; springers, 21s. to 23s.; milk cows, 41s. to 45s. Lambs sold readily from 25s. to 28s. each; ewes (Scotch-faced), 25s. to 35s.; ewes (soft) from 45s. to 60s. Sows and farrows realised from 21s. to 23s.; but little business was done in store pigs for which from 50s. to 70s. each was demanded.
THE KEANE MEMORIAL.
Soon after the registered death of the late Col. H. Keane last year, it was strongly rumored by the many friends and admirers of the deceased gentleman that it was their intention to have a public memorial for the purpose of perpetuating his memory erected either on the Square or in some other suitable part of the town. Considering what this popular and enterprising gentleman had done for Cappoquin in various ways, this suggestion was warmly welcomed by all classes of the townspeople, and that the least honour which could be paid to his memory was the erection of the proposed memorial. Although many of our people have now passed his death, no public action has yet been taken in connection with the memorial, and it may be no harm to suggest that a meeting of the townsmen should be called to consider the matter.
THE NEW CINEMA.
Cinema lovers in Cappoquin and the surrounding districts will be delighted to learn that the new Cinema to be opened in the Boathouse Hall by the Lisimore Cinema Co. will be formally opened to the public on Friday night, 22nd inst. All the necessary expenses required by Mr. J. Bowen, county surveyor, and which now strictly comply with all the requirements of the Cinema Act of 1909, have been constructed, and nothing has been left undone, either on the part of the Cinema Co. or the Committee of the Rowing Club to make this Cinema Hall one of the safest and most comfortable in the South of Ireland.
THE RE-PLAY.
In connection with the re-play of the Dungarvan v. Aghish Senior Football match, which ended in a draw after a great game on last Sunday week, it was hoped to have the decider held on next Sunday, 17th inst., but this has now been rendered impossible. The Senior Hurling Final between Erin's Own, Waterford, and Lisimore, which was won on the field by the former in Dungarvan several weeks ago, has been held up indefinitely owing to objections from both sides. Lisimore won their objection at the next meeting of the County Board, while the counter-objection of Erin's Own was ruled out of order, but the latter then appealed to the Munster Council, which has now referred the matter back again to the County Board for final decision. Pending the decision of this body, nothing can be done in the meantime as regards the fixing of a date for the Dungarvan v. Aghish re-play, but all concerned may rest assured that the date will be fixed at the earliest possible moment.
A NECESSARY SIGN.
We have been asked to call the attention of the G.S.R. Co. to the necessity for erecting some distinctive signs at the Cappoquin Station showing travellers that this is the station for Mount Mellery. Owing to the proximity of Cappagh Station, only five miles away, travellers intending to visit Mount Mellery have often been misled as regards their proper destination owing to the close similarity of names, so we think the Railway Co. would be doing an act of great convenience to the travelling public by having such signs erected at both platforms in Cappoquin. At Ballinacorney Station, on the way to Dublin, a notice is prominently displayed that this is the station for Clongue Woods College, and at other stations notices are also displayed as regards Rockwell College, etc., and as most of the travelling public on the railway make Cappoquin their destination for Mount Mellery, we hope the Railway Co. will see the necessity for complying with this suggestion.

CIVIC GUARD TRANSFERRED.
Guard Doran, who had been attached to the Lisimore Civic Guard Station for the past three years, is transferred to Dungarvan, and brings with him to his new station the best wishes of the law-abiding citizens of this district, who found in him a courteous and efficient member of the force. Guard Reidy, Dungarvan, will replace Guard Doran at Lisimore.
SUCCESS.
The Jubilee Sale held in aid of the funds of the Lisimore Hockey Club was a decided success, and as a result the piano purchased last year for £60 has now been paid for. This is no small achievement on the part of the Club members, and speaks well for the popularity of the Club. We now congratulate all concerned on the success which attended their efforts. The social side is always an attraction we note in Lisimore, but we would wish to remind playing members that Lisimore have entered a team for the Bolster and Long Cup Competitions, and would like to see a much larger attendance at practice. Without practice the Club is not set, so to speak, and it is of paramount importance that both sets should attend on the days fixed for practice, and if indeed it is their, then so much to be blamed. In the past we have heard after the contests are over too many "ifs," and at the opening of the season is the time to have these rectified. We hope, therefore, that a spirit of esprit de corps will exist, and we will not have to refer to this subject again. It would be well to remember it is the honour of Lisimore H.C. is at stake, and all are expected to give of their best in the interests of sport.
ON DUTY.
Dr. Healy, M.B., medical officer, is back again in his duty after annual holidays.
FIRE.
Lisimore Town Commissioners have the whole-hearted support of the citizens in the work they have on hand at the moment. We refer to the matter of procuring a proper hose in the event of an outbreak of fire. As a result of a test on Friday last it was ascertained that only a few lengths of hose will be required, but, of course, some of the hydrants will require trivial repairs, and the Commissioners anticipate that Lisimore Castle will have these defects remedied.
SUNDAYS ONLY.
At the last meeting of the Town Commissioners a member objected to assess carts and taxicabs at Chapel street close to where the latter street crosses the Main street. His objection was to the danger to the motorists coming down the hill. Another member, however, considered it rather an advantage to have some obstruction there to check motorists, stating it was much better for them to run into an ass than into a Christian. All the members agreed that the Chapel street Corner was a most dangerous one, but also agreed more or less that an ineffective ass properly secured to the railings underneath the signs of the Courthouse did not hamper the thoroughfare very much, and after a discussion it was unanimously agreed to grant a permit for Sundays only at the particular place for asses.
FIGS.
Fat pigs at the live-weight market were 67s. per cwt.—a drop of 2s. per cwt. on last week. The monthly fair was up to the average for October month.
THE COURT.
Lisimore monthly court was held on Thursday, 14th inst. Report in next issue.
Carlton Best Factory—Owing to the advanced state of the building and the risk involved to visitors and machinery, the Carlton Best Factory site will henceforth be closed to the public.
Kilrossanty Champions—At the Gaelic Field, Dungarvan, on Sunday last the final in the Junior Football Championship of the county was played between Kilrossanty, champions of the West Division, and Pearse's, champions of East Waterford. The attendance was good. Mr. C. Ware was referee. From start to finish the Comeragh boys had matters their own way, and in science and dash outclassed their opponents in every part of the field. So great was the defence of Kilrossanty that no score was scored during either half by the city men, while at full time Kilrossanty had 3 goals 5 points to their credit. For the winners the Brothers Ryan, Fitzgerald, Lonergan, O'Riordan, played a grand game. We hope to see the champions continue in training and add further laurels to their banner in the days to come.

COME TO US FOR Your Groceries and Provisions IT'S WORTH WHILE.

We would like you to consider the question for a minute or two.

It is evident that in buying Groceries and Provisions as in buying other things, one's great object is to secure goods of excellent, dependable quality, and to secure them at prices which help you to save money.

The two salient reasons why it is worth your while to come to us for your Groceries, etc., are these—

- 1.—The Quality of everything we stock is first rate. 2.—Our prices are the very lowest possible.

Also you will be served well and courteously at

MERRY'S STORES, Dungarvan.

J. B. COOKE, Watchmaker, Jeweller, etc., 2 Main Street, DUNGARVAN.

The Better Made Suit Makes a Difference. . . It Makes You Look Better, Smarter and Better Dressed. It Wears Better.—It Feels Better.—It is Better.

Why risk a misfit? You can ensure a perfect fit in a Suit made to suit you by ordering from us. Our representative travels your district. He carries a full range of patterns and will take your measure on the spot. We save you time and trouble. Our prices will be a revelation to you.

Remember, wherever well-dressed men meet, it is the badly-dressed becomes conspicuous.

C. Murphy & Co., Merchant Tailors and General Outfitter, 55 Main Street, Dungarvan. ENQUIRIES PROMPTLY ATTENDED TO.

Dungarvan Urban Council

APPOINTMENT OF SOLICITOR.

COUNTY SURVEYOR THREATENS CITY FATHERS.

At the meeting of the above held on Friday last Mr. M. Brennan, P.C., chairman, presided. Also present were—Wm. O'Donnell, J. Hackett, M. Clancy, R. Craig, P. J. McGrath, T. O'Mahony, M. J. Keane, J. Moore, J. Butler, T.D.; T. Power, M. Griffin, John Curran and Thos. McCarthy.

EXPENDITURE.

The expenditure for the week was £27 13s. 6d. Payment was passed.

CHANNEL AT ABBEYSIDE.

Arising out of the minutes of the last meeting when a letter was read from Miss H. Sullivan, Abbeyside, re sewerage. Messrs. McGrath and Craig spoke on the necessity of putting a surface channel from the back of the Shears street houses pending the sewerage scheme being laid down by the contractor.

OPENING MAIN ROADS.

The Chairman asked the Borough Surveyor when the opening of the road at the new houses would be finished and where the new openings were made on Tuesday last.

Borough Surveyor—There were no new openings made this week.

Chairman—Mr. Bowen reported at the finance meeting of the County Council on Tuesday last that on that morning two new holes were made without permission.

Borough Surveyor—That is not right, as I had a conversation with Mr. Bowen regarding all the hydrants.

Mr. Clancy asked was it the duty of the Borough Surveyor to do the hydrants on the main roads and if Mr. Bowen wants a separate order for each hydrant.

Mr. McGrath—If one of the mains burst must we wait until we notify the County Council that we must open the road to repair it?

Chairman—I don't believe in a case of that kind that we should wait. Carry out the repairs and give notice at the same time.

Borough Surveyor—Mr. Bowen got a verbal notice from me about all the hydrants. Chairman—Mr. Bowen denies that he got notice.

Mr. McGrath was understood to ask if the Council should sit here at all, and that he would propose to hand over the town to the County Council.

Mr. Clancy—The Borough Surveyor should have the power to put all the hydrants in working order.

Mr. Power suggested that a deputation from the Council meet the County Council and come to some definite understanding.

Mr. McGrath—Why are not the hydrants in Main street, which are not under the County Council, being repaired?

At this point the Clerk read the following letter, which was considered at the finance meeting of the County Council on Tuesday last—Gentlemen—I beg to report that the Urban Council of Dungarvan have made numerous openings in the main roads through the town, which are in my charge, without giving any notice whatever to me and without obtaining authority as required by law. Some of these openings are not yet filled in, while others are not properly made good.

I interviewed the Chairman of the Urban Council on the 1st inst., and he informed me that a week previous to that date an order was made prohibiting any opening being made without due notice and authority, but as a matter of fact several openings were made in the period stated. I was further informed that the Urban Council on 1st inst. made a definite order strongly specifying that no further opening was to be made without authority, but even this morning I find men are engaged in making a new opening.

I have repeatedly warned the Urban Council that I could not allow this to proceed. Your solicitor wrote them on 23rd ult. and received a reply stating that no more openings would be made without authority, and suggesting an agreement.

I submit that it is time to stop all further playing with this question and to take such action as will permanently secure that no unauthorized persons will interfere with the roads. It is very little loss relying on an agreement with a body which cannot secure compliance with its own legitimate orders.

An agreement with the Urban Council or with private persons for road openings should involve the giving of due notice, obtaining proper permission, and providing for the restoration of the surface by the County Surveyor at the cost of the body making the opening. The costs should be deposited with your Secretary before permission to open the road is granted.—J. Bowen, B.E.

Mr. Power—Does he call the continuing of the work you were at the previous week a new opening? Borough Surveyor—Yes.

Chairman—Mr. Bowen did not mean the work you were at. The opening was made in a different place altogether.

Mr. Butler—No. The place he referred to I understand is below the Convent.

Mr. McGrath—Give over the town to the County Council. We sit here as a council and we ought to have as much brains to do the business as anyone else.

Chairman—I would like to warn this council that unless matters are properly fixed up between this body and the County Council we will find ourselves with an injunction against us.

Mr. Keane—What is the opposition to giving Mr. Bowen due notice?

Mr. Craig—When an order is made it should be carried out. The Borough Surveyor should give written notice to Mr. Bowen and file a copy of the notice here

with the Clerk.

Borough Surveyor—Since this night nothing new has turned up.

Mr. Clancy—What is this council doing? They should give water to the new houses.

Chairman—I agree we should, but the pipes could have been brought at the back of the houses.

Mr. Clancy—The County Home is an institution which pays a big amount of rates to this council, and we are doing the right thing to try and improve their supply.

Mr. Butler—I agree with Mr. Clancy's remarks.

Mr. Clancy—I suggest the Borough Surveyor write to Mr. Bowen for permission to uncover all hydrants in the Main streets in the town and Abbeyside.

Mr. Curran asked would the connection made to the new houses flush the closets, and also who was to put up the gateway between the two blocks of houses?

Borough Surveyor—The question of a gate was not in the specification, as in the first instance the houses were to be built in one block. We must get quotations for that work.

Mr. Curran—Speed the matter up. Mr. Keane said the making of the sewer at the back of the new houses was going to be an expensive job. All the men were working there now for three or four weeks.

Borough Surveyor—No. They are not there constantly.

Mr. O'Donnell drew attention to the footpath at Mitchell street where there was cut across which were very dangerous, and said whether it was the Urban or County Council were responsible it should be done.

Mr. Butler—Draw the attention of the County Surveyor to the matter.

SOLICITOR TO THE BOARD.

The following letter was read—I regret to report that Mr. J. F. Williams, who was solicitor to your council, died on the 11th August last. I am at present conducting his business as a solicitor. Pending a permanent appointment by your council I beg to apply to the council to appoint me temporarily to this position for a period of three months. It is within the power of your council to do so. If the council should see their way to appoint me I shall give every care and attention to any legal work of the council entrusted to me.—Your obedient servant, Francis Murphy.

Mr. Butler—Give notice for next Friday night's meeting.

Chairman—You have two important cases coming off and it would be well to have a solicitor temporary.

Mr. McGrath—I propose that we appoint Mr. Murphy, of the firm of J. F. Williams and Son, as temporary solicitor to the Dungarvan Urban Council for a period of three months.

Chairman—I second that proposition.

Mr. Butler—This is a temporary appointment and you can't do that without giving notice.

Mr. McGrath—You have a full board tonight.

Mr. Butler—But notice must be given. Mr. Clancy asked why a temporary appointment was being made—why not make a permanent appointment?

Chairman—We are quite competent to decide the question tonight.

Mr. Keane proposed an amendment that the appointment of solicitor to the board be deferred until this night week.

On a poll being taken on the amendment of Mr. Keane the voters were—For—Messrs. Hackett, Moore, Butler, Clancy, Power and Keane—4. Against—Messrs. O'Donnell, Craig, McCarthy, Griffin, McGrath, Mahony, Curran and the Chairman—8.

Chairman—I will now put Mr. McGrath's resolution.

Mr. Butler—I will propose an amendment.

Mr. Keane—This thing was sprung on the council. We should get time to consider it.

Mr. Butler said he would propose another gentleman who was a capable man—a man who lived in one of the council's houses, and who was married to a lady who was born and reared near the town. The man he proposed was Mr. Spears.

Mr. Hackett seconded.

Mr. McGrath—I am not against Mr. Spears, but we can get the work done through the office where it was always done.

Mr. Butler—That does not arise. It is between Mr. Murphy and Mr. Spears.

Chairman—It is between Mr. Murphy on behalf of J. F. Williams and Son or Mr. Spears.

Mr. Butler—No, sir; it is Mr. Murphy or Mr. Spears.

On a poll being taken the voting was as follows—For Mr. Murphy—Messrs. O'Donnell, McCarthy, Griffin, McGrath, Curran, O'Mahony and the Chairman—8. For Mr. Spears—Messrs. Hackett, Butler, Moore, Clancy, Power and Keane—6. Mr. Murphy was declared appointed for three months.

DRAPER'S FIELD.

The following letter was read from the arbitrator appointed in connection with the above and adjourned as the new members know nothing of the appointment—The sanitary condition of the field known as Draper's Field having been duly submitted to me for arbitration and having inspected the field in dispute accompanied by the solicitors for the respective parties and having heard what was advanced on either side, I hereby find:

(1) That the condition of the field is due to the sewerage from the several tenements being drawn into the field, and the Urban Council as Sanitary Authority are liable to properly construct and maintain suitable drain in the field and to make good the damage to the wall caused by percolation of sewerage matter. I hereby find in favour of Mr. James Draper and award him £3 3s. costs and expenses in

connection with this award.

Dated this 27th day September, 1926. Thos. Power, Arbitrator.

A letter was read from the L.G.B. re Mr. Bowen's report on the water supply, stating that the report sets out that as the reservoir was leaking at the rate of 260,000 gallons daily, on the facts set out in the report it would appear that the standing of the reservoir is a work of pressing necessity, and they submit the council would be well advised to submit proposals for carrying out this work.

If such a scheme is put forward, accompanied by an application for sanction to the raising of a loan, the Minister will be prepared to recommend the case to the Department of Finance with a view to securing an advance from the Local Loan Fund. A formal application for sanction to a loan is enclosed.

Mr. Curran proposed they take a grant, but no loan as we had enough already.

Mr. Butler said he suggested something like that a few weeks ago when he was convinced that a long term loan would be the only way to remedy the water supply.

Mr. Clancy held if they could get a loan on a long term it would improve the water supply.

Mr. Curran said they had borrowed enough already for the water.

Mr. McGrath—We spent between loan and grant £2,250 on the supply recently.

Chairman—You have spent over £1,000 on two supplies and yet we have not got one. If we adopt the letter from the L.G.B. you will be only adopting Mr. Bowen's report.

Mr. Butler proposed that the Clerk get into communication with the L.G.B. to know if they give 30 or 35 years' loan.

Chairman—If we can spend the £1,000 we are to be refunded of the main roads the town will not be any worse off.

Mr. McGrath—Will it be certified that we will have a good supply?

Mr. Griffin said his opinion was that they should get a pumping station.

Mr. Keane—Mr. Bowen in his report said there was plenty water coming in, and then why should we go to any further expense?

Mr. Power—If there is plenty coming into town (as the report says) where is it going?

Mr. Keane—I am afraid if we build a new reservoir we will come back here and he told there is something else to be done.

Mr. O'Donnell—Does not the County Surveyor say there is enough water coming into town? Where is the necessity of anybody spending more on it?

Mr. Butler—My resolution is only asking a question as to what terms we can get.

Mr. Keane—Isn't there an overflow at the head works?

S.B.O.—To my mind there is more water used for personal use than for domestic use.

Mr. Butler proposed that the Clerk be instructed to get into communication with the Minister of Finance and the L.G.B. with a view to getting a loan for a term of 35 years for the amount necessary to put the reservoir right according to Mr. Bowen's report.

Mr. O'Donnell—Delete the reservoir and apply the money to something else.

The proposition was passed.

CHRISTENING NEW HOUSES.

Arising out of a discussion adjourned from the last meeting re the name to be given to the new terrace at Mitchell street, Mr. Butler proposed that it be named St. Garvan's Terrace.

Mr. Moore proposed that the name be Loughmore Terrace.

Mr. McGrath, who had proposed Springmount Terrace at last meeting, withdrew his proposition in favour of St. Garvan's Terrace.

The houses were named St. Garvan's Terrace by 10 votes to 8 for Loughmore Terrace.

TOWN HALL.

On the proposition of Mr. McCarthy, the Borough Surveyor was instructed to put a fire grate in the ladies' dressing room of the above.

Mr. Craig asked him to attend to the sanitary arrangement there.

TAR BARRELS ON QUAY.

Mr. Craig called attention to the state of the quay during the week where a cargo of tar was discharged for the County Council. He thought the County Council should be charged storage on them as the barrels were an obstruction.

After a long discussion the Chairman ruled the discussion out of order.

Mr. Craig said he would bring the matter forward again.

DISUSED GAS LAMPS.

On the recommendation of the S.R.O. the council granted him permission to sell the above to the Tallow Lighting Committee.

THANKS.

Mr. John Kiersey, Chairman County Council, wrote thanking the council for resolution of sympathy passed to him in his recent sad bereavement.

SYMPATHY.

The following resolutions of sympathy were passed in silence, all the members standing—Proposed by Mr. M. J. Keane, seconded by Mr. T. Power—"That we, the members of the Dungarvan Urban District Council, tender to Rev. L. Egan, C.C., our sincere sympathy on the death of his father."

LISMORE TOWN COMMISSIONERS AND THEIR POWERS UNDER THE CINEMA ACT.

At the monthly meeting of the Lismore Town Commissioners, Mr. Thos. Croxley, chairman, presiding.

Arising out of the receipt of an application for a licence under the Cinema Act received from Mrs. Ellen Hynes, South Mall, and which was dealt with at a special meeting of the Commissioners when the licence was granted for one month provided certain recommendations were carried out, and also to enable the Commissioners to ascertain their powers, etc., as the Licensing Authority under the Act, the Town Clerk (Mr. Ormond) now proposed the Cinema Act, 1909, and the Censorship of Films Act, 1923. It was on the question of censorship and the holding of pictures on Sunday nights that the members differed at the former meeting.

Some members having perused the Act, the Town Clerk read Section 10 of the 1923 Act as follows—(1) It shall not be lawful for the Council of any County, County Borough or Urban District or for any Town Commissioners after the passing of this Act to attach to any licence granted under the Cinematograph Act, 1909, any condition or restriction as to the character or nature of the pictures to be exhibited in the premises to which such licence refers.

The Clerk pointed out that all these films were censored by a Board of Censors in Dublin.

Mr. Murphy said in another part of the Act he had just read it was apparent that the Commissioners could reject an application for a licence if they so desired.

The Clerk replied in the affirmative.

Mr. Heelan—It simply means we have no power to censor films or prevent the holding of them on Sunday nights.

Clerk—To see that your recommendations are carried out by the management is only your business, and he (clerk) was sure this was done.

Mr. Heelan—I understand the place was passed by Mr. Bowen, county surveyor. Continuing, Mr. Heelan said he would like to know how long was the Town Commissioners in power as the Licensing Authority.

Clerk—Since 1909.

Mr. Heelan—This is the first time this application has come before us. I believe heretofore it was the County Council that dealt with the application and got the fee.

Clerk—That is so.

Mr. Heelan—I propose that we write the County Council then for repayment of the fee £1 per year for the number of years the cinema is opened at Lismore.

Mr. Duggan said he thought it was opened in 1922.

Mr. Heelan—Then why not apply to the County Council for £4? It would do the town scavenger's wages for one month (laughter).

Mr. O'Shea said he thought it would be much better and wiser not to do so.

Mr. Heelan—If we owed the County Council money they would very soon let us know (laughter).

Mr. O'Shea—They may have a contra account against you for more than that amount (more laughter).

Mr. Heelan—Well, it shows a certain amount of dereliction of duty on our part to the ratepayers if we don't look this up. It would show them that we are on the alert.

The matter was allowed drop, and further consideration of the correspondence, etc., dealing with the Cinema Act was adjourned to a special meeting of the Commissioners, when the matter of the renewal of the licence will be considered.

A SAINTLY PRIEST.

A saintly priest, whose name recalls Some golden moments in my life; Upon my ear it ever falls.

As something free from worldly strife, I've travelled widely—travelled far, Of praise and blame I've had my fill, At home I've found a guiding star.

In Father Dowley, now of Kill. To meet him is a pleasant treat, So strong his faith and hope and love; In church or hall or village street One feels his gifts come from above.

Before his nobleness of mind, His charity, and rare goodwill, Men to each other grow more kind—Dear Father Dowley, now of Kill.

The people crowd to hear his Mass, Their piety is glad to see; No erring one the time will pass In careless ease upon one knee.

Absorbed are they at sermon time—And how his sermons charm and thrill, So terse and apt, and so summing—Dear Father Dowley, now of Kill.

I have in mind one autumn day, A sad and solemn funeral throng, His surplised form leading the way, From home to churchyard—two miles long.

The night was rare, the people wept, And blessed the priest with heart and will; Green has this memory since been kept Of Father Dowley, now of Kill.

Beloved alike by rich and poor, The children's friend, they love him, too; No needy ones e'er pass his door Except to bless and praise anew.

The sentinel upon the tower, He guards his flock—blessed every ill, To soul and body—gained our ill! That Father Dowley came to Kill!

M. F. SHEEHAN, P.C. October 8th, 1926.

Youghal Notes.

SPRAT FISHING.

Another big consignment of cured fish, packed in barrels, left Youghal by steamer on Sunday. The past week was not as productive as those preceding, but a fair amount of work was done and money earned. Some of the men unfortunately don't put their hard-earned cash to the best advantage, liquidating a larger portion than they should, and gambling more of it. Flirting instances are related of the amounts of money squandered at the entertainments in the Fair Field, or round the corners on "pitch and toss." It was publicly and authoritatively stated that one man handed his money to a publican to provide against the danger of a "future thirst unmet." Tales are told of men squandering in various gambling methods as much as £1 or even £2 of a night. If they were on their "onyo-o" it would not be a matter of so much consequence, but in many cases the poor wives and kiddies have to suffer for it later on.

THE TECHNICAL CLASSES.

The old proverb puts it: "Teach maith leath na h-olub," and it is earnestly to be hoped that the successful opening of the new Technical Schools in Church street last week will bear further proof, if such were needed of the truth of the saying.

Large numbers attended to register their names for the various classes, and now that the mad craze for dancing night after night, "Sunday, Monday and holiday," has died down to a great extent, we may confidently look forward to a consistently large and regular attendance of students firmly determined to improve the shining horns by preparing themselves to fight in a fitting manner for the future battle of life. If things turn out as they should, if our youth left school, take a proper view and perspective of life, and act accordingly, every available seat in this fine new school should be occupied every possible night by some student determined to make the best of the advantages held out to him, at a trifling cost and under most comfortable conditions during the long dreary winter nights. Owing to unavoidable reasons, the school is not in full swing yet in all its departments, the Commercial amongst other classes not yet being opened, but all this will be made good in the near future.

This matter will come before the usual meeting of the County Committee on the 19th inst., and those anxious to take up Commerce will be enabled to do so. In the meantime the capable and courteous Head Master, Mr. E. J. Ryall, will give intending students information on all points concerning the classes. Now is the time to register their names. Those who put it off will be left in the lurch, as teachers can't go back to the beginning for the convenience of late comers.

CLEANLINESS NEXT TO—

According to a communication read at the last meeting of the Urban Council, a long-felt want is being met by the enterprising proprietors of "The Hot Baths" in Strand street, where fresh and salt water and curative baths of various kinds will be henceforth available all through the year. Hitherto these were open during the summer months only, to meet the requirements of our "Gibber" or "Gyribrick" visitors. For the future the townpeople will have an efficient service of baths all ways at their disposal. This is a matter of great importance, not alone to public hygiene, but also to the public health, and we therefore trust that the enterprise will receive the support it richly deserves. The large majority of houses in the town are without such great conveniences as baths. With the all-year opening now under way, all can indulge in the healthful luxury of a hot bath any time they choose, and at a very modest cost.

COAL AND TIMBER.

During last week the local supply of coal ran completely out and the people, especially the poorer classes, were driven to all kinds of expedients to meet the necessities of the occasion. It would have been bad enough during the fine weather of the summer, but coming with the recent break, things were rendered very much harder. A cargo had been expected in, and tide after tide, boats crews went out quite a distance seawards in the hope of being employed to pilot the precious cargo steamer in. "Hope deferred maketh the heart sick," and up to last night the horizon was closely scanned for the welcome lights. But not a sign. This morning about 6.30 the hoot of a steamer's siren was heard, and the good news quickly spread that the eagerly looked for "black diamonds" had at long last arrived in the harbour. She quickly berthed at the Pier Head and during the day two gangs set gladly to the work of discharging her. As was to be expected, the price is a bit stiff—running at 8s. in the yard to 8s. delivered on the Strand, with some increase for smaller quantities, but there is no help for it in the circumstances. It was well to get it even at the money. Though the cargo cannot go very far, it will fill up the gap for a time till something else turns up.

Just at present there is a Danish vessel, the "Pallesen," of Thuro (wherever that is) discharging a cargo of timber at the upper quay for Messrs. B. Farrell, Ltd. It is quite a time now, some years before the war, since a cargo of timber was imported directly. It was a matter of frequent occurrence in the old days. The present cargo comes from Norway. In former days similar cargoes used to be imported from "across the pond"—Minnesota, etc. It is said that another local firm—Messrs. M. Murray and Sons—are also about bringing in a cargo. However we stand as regards coal in the near future, there will be evidently no scarcity of timber.

BIRTHS. LANG—October 2nd, in Dungarvan, to Kathleen J. Long (Gardia) (Dermot Francis).

Rexall Harvest Sale

OCTOBER 21st to 30th

HERB is another unique and exclusive offer by the Rexall Chemists of Great Britain and Ireland. You purchase any of the items listed below at the ordinary price and we sell you a Second Package of the same product for ONE PENNY EXTRA.

Preliminary Announcement OF A NEW TYPE HIGH SPEED LIGHT CAR.

"The Overland Whippet,"
So named for its qualities of speed, agility, power and endurance, after the famous racing thoroughbred—
"THE WHIPPET"

THE OVERLAND WHIPPET is a revolutionary low-slung modern car, radically different from the old-fashioned, high-in-the-air carriage type of car that it is designed to supplement or replace.
It is a complete new car, designed and built as a unit, not an old-fashioned chassis reconstructed. For over three years Willys-Overland engineers in Europe and America have been developing it. Its high torque, 31 horse-power engine of small bore and long stroke, embodies the same engineering principles used in the fastest racing cars of America and Europe, and 500,000 of road tests have proved its practical advantages beyond all doubt.
The 15 rated horse-power engine will actually develop more than 30 horse-power in use.
Its wonderful activities—flashing bursts of speed and quick acceleration have never been available in any car of equal power. Step watch tests show that it accelerates up to 40 miles an hour, 19 per cent. faster than other high cars. It runs like a six, pulls with irresistible power, no average hill can stall it.
In distinctive body lines, the WHIPPET frankly resembles the smartest-built cars, complete symmetry of design has been achieved with compact external dimensions: height and length are in time artistic proportions, and it is beautifully finished in a pleasing shade of rich Appennine blue, with durable trip-coated leather that will retain its lustrous beauty for many years.
From the standpoint of engineering, performance, comfort, economy, appearance and quality, the OVERLAND WHIPPET has established an entirely new criterion by which all other light cars must be judged.
See for yourself.
Demonstration cars will shortly be available, and a three-minute study of the many superiorities of the WHIPPET may save you from buying some obsolete car.

At the Finance Council on Tuesday, appointment of a team for the district Youghal No. 2 was of Mr. M. F. Lynch up for consideration. The Messrs. P. Molloy, Messrs. M. Molloy, O'Shea, F. O'Gorman, J. G. Doherty, Walsh, D. Campbell, McAniff, N. Pinner, P. J. Power, M. G. J. Sheehan, L. H. Tobin, T. Harty, D. Moran and James K...
On the 5th October, the Department... information of the M. F. Lynch, M.R.C. and Youghal district. The Finance Council at the Department... appointment of a team areas put on the agenda of the Finance Council. With regard to variation with Mr. Lynch, I have in hand, who had been the late Mr. Lynch, none until the 19th in serious matter not to be in those areas, who is at present dealing of sheep and he would be glad to be proved of this arrangement.
The Secretary of Agriculture replied as follows:—In reference to the 5th inst. Mr. Flannery, Chief of the Department, so far as this Department there is no objection to Mr. Lynch's carrying on the duties of the Animal Committee. Mr. M. F. Lynch, the appointment of the last ordinance with the 1926.
Mr. O'Gorman—V.S. for Youghal No. 2, Mr. N. Power, V.S. and Mr. Lynch got the two areas were years ago by making was a great injustice district not to have I propose that we try to and appoint and so give facilities Ardara and Clashmore—How has been ungrateful Secretary—They number of years ago Mr. O'Halloran so den call at night Youghal No. 2 to go all the way to what they had to do and now they want in justice to the names on the spot Mr. Kerney—I we are circumstances If we want a V.S. more. If you have disease it is with the of Animals Committee of the local estate.
Chairman—I don't want at all. We ability of making a does not arise before Mr. O'Gorman—beginning and initial as if you make an not go back of it.
Chairman—Any to-day is only temporary Mr. O'Halloran—question? Chairman—Thomas lives in L... thing, and two areas. The V.S. should which he is appointing Mr. Ward said sent from Youghal matter, and he would be heard.
Chairman—I have any deputations, but agenda before us I at all.
Mr. Ward—We cation to-day.
Mr. Conway—Is be considered?
Chairman—No, it The appointment of on the agenda, but Mr. Conway—The
