GREAT HURLING MATCH IN DUNGARVAN

The first round of the Dean Ryan Cup (hurling) between St. Augustine's Seminary, Dungarvan and C.B.S. Dungarvan, was played at the Gaelic Field on Satur-

The teams took the field punctual and were set in motion by J. Goode. The opening exchanges were very even and opening exchanges were very even and the teams were showing great form. After a bout of play at midfield where Dempsey and O'Connor were fighting out great duels, the C.B.S. boys got going and opened the scoring with a goal. Play was next brought to the C.B.S. territory and their defence proved sound. The play was soon transferred to the Friary end and after some great clashes a further end and after some great clashes a further score resulted for the C.B.S.

The play was now very keen and exchanges at this stage of the game favoured the C.B.S. boys, and they were all out for a great victory. The Friary broke away and after some nice team work they registered their first score after twenty minutes play. This score put the Friary boys going and they pressed hard for another, but to no avail, the backline of the C.B.S. was holding out and could not be further penetrated. For the remaining part of this half-hour the game was splendily contested and each side had an equal share of the honours. The score at half time was-

may have something to do with it, but when the cause is sought in dog biscuits the charge will not bear critical examination. Plenty of people have written that their dogs have had it when they have been fed on nothing but flesh. As a rule an attack is not followed by serious consequences, but it may recur, and it is very awkward to feel that one's dog may be seized in a public place.

It is quite evident that the whole question needs to receive the serious investigation of scientists who have no preconceived prejudices and are likely to be misled by so-called "evidence" that will not bear examination. As far as I can see it does not affect one type of dog more than another. In some instances we know it is caused by minute parasites in the ear, but I do not imagine that such cases are partiknowing if the ears of afflicted dogs have
