#### Bountiful Harvest

The sound of the reaper is now heard in every part of our land and the golden grain, on which our very existence depends during the coming year, is being carefully harvested by willing and experienced hands.

A few months ago the tiny seeds were consigned to the gentle earth, and now the eternal miracle of the seasons has brought us a countiful harvest.

The present emergency has taught us that we must make the most of our resources if we are to survive, and many have realised for the first time how productive this Motherland of ours can be if we properly avail ourselves of its riches.

Just as the fruits of the earth develop from the microscopic seed, the small premiums paid on the Policies of The Irish Assurance Company, the leading Irish Lite Office, will provide the capital required for the winter of your years and the welfare of your dependants. In this case however, there is no fear of a bad harvest, as the security of our Assurances is absolute.

May our local Representatives help you to provide for the years
