The reasons given for the compara tively small sales of garden produce were: that in the year under audit the rural science teacher was absent on sick leave for a period of six months and could not accordingly give the necessary supervision to the school gardens; that a large proportion of the garden produce at Dungarvan centre is used in the school kitchen, and that at Cappoquin the garden is too small even to meet the needs of the domestic economy needs of the domestic economy classes at the school.
