TIME IS THE ART OF THE SWISS

Even Steel is Too Soft FIND the hardest steel on earth. Take two pieces, knock them together, stop half a million times a day for years — and there'll be obvious signs of wear. That's why, at certain vital points in a watch, good watchmakers use jewels. For jewels are harder than any metal. But here the Swiss watch craftsman is supreme. A watch will keep exact time year after year only if those tiny jewels are shaped and measured to a hair's breadth. And in the uncanny skill, the Swiss lead the world.

Ask your jeweller to show you some Swiss Jewelled-lever watches; then take his expert advice.

These Two Jewels on the lever-arm, lock and release the escape wheel teeth 432,000 times a day.

Only Jewels are hard enough to resist wear at this point for years on end.

For lasting accuracy, jewels elsewhere are useful too. Jewels here are essential.

RONALDE RONALDE FOR DUNGARVAN

...of few people were surprised to see the name of Ronnie Ronalde advertised across the pages of this newspaper last week. Many thought the name was a mistake of some kind.

But the fact is that Ronnie Ronalde is a very well known name in the world of music. He is the C.S.M. Ballroom in Dungarvan on Monday night. Sept. 14th he will be guest star with his Orchestra (Mills).

What an occasion this is for us. Few of us expect to see this famous performer on our side of the water. She will be doing a concert and I doubt that any

### AN IRISH PRIEST'S REQUEST

At the request of a very good friend in far away Australia - Fr. Men like him may have passed on but in memory they live in our midst. Good wishes to you Fr. Coffey and to all our friends in Australia.

### COMERAGHS RUGGED HILLS

In memory by the mountain-side I strayed at close of day To view the glens and purple heights alas! now far away. Where lonely Mahon silver stream flows by the ancient mill, It's torrents into foam o'er Comeraghs Rugged Hills.

LIFE BEFORE THE GREAT SWEEPSTAKE

A very powerful horse. De Re Metallica, from which this picture is taken, was written by Georgius Agricola of Saxony, and printed in Basel in 1556. Informative as well as lavishly illustrated it remained the standard text book on mining and metallurgy for several centuries. It was well translated into English as late as 1912, and re-published in America in 1950. Apart from its technical content, it gives a vivid description of life and working conditions in the mining communities of his time.
