SALVAGE CASE—BRIG FERONIA

The Mayor, James Esmond, Esq., J.P., and Doctor Poole, assembled at the Town Hall, on Wednesday last, to adjudge as to the amount of salvage to which Chief Officer Kemp, of the Coast Guards, and some of his crew...

Mr. Kemp claimed £200 for himself and crew; William Power claimed £200 for his own services and the assistance of his crew. A great number of persons had collected to hear the issue of the case.

Mr. Kemp, Chief Officer of the Coast Guards claiming, deposed that he is a Lieutenant in the Navy. About noon on the 28th ult. he saw the *Feronia* standing into the bay of Tramore; his men were at church at the time...

Mr. Hassard, on behalf of the owners, cross-examined Mr. Kemp. Witness admitted that when the *Feronia* anchored it was not according to his signals; it is his duty, as officer of the Coast Guard, to board every vessel coming into the bay...

Mr. Hunt sworn. Lives at Tramore; saw the brig coming in on the day above-mentioned; from the appearance of the vessel he could not conjecture that she had been abandoned or that the captain wished to destroy her.

Mr. Stephenson, L.R.N., was here tendered for examination by Mr. Alcock, but Mr. Hassard would not allow his evidence, as he was present during the examination of the previous witnesses, contrary to arrangements agreed to by both parties.

Witness sworn. Lives at the Cove, Tramore; is a fisherman; knows the coast these forty years, and thinks the Lady's Cove at all times a dangerous place to pass into.

CURE OF CONSUMPTION.

A cure of consumption is sometimes effected, even after the tubercle has been expectorated and the cavity formed, by a natural process of contraction and retraction, draws together, by degrees, the sides of the cavity, until it at last closes to exist, and its place is merely marked by a puckered skin on the surface.

KILDARE ASSIZES.—NAPLES, SATURDAY, MARCH 29.

TRIAL OF PATRICK WATERS FOR THE MURDER OF CHRISTOPHER BROUGHILL, ON THE 9TH OF JANUARY, 1833. After the prisoner's agent had challenged all that he could challenge, a highly respectable jury was sworn.

Lewis Fitzpatrick, an approver, examined.—Has been in jail since the ninth of March was twelve months; was confined for demanding arms; was a Whitefoot; was sworn in about a month before Broughill's murder; was one of the party who went to Broughill's house...

By the Court.—What is meant by a Whitefoot? Why to be a good fellow. Was Grimes, who shot the man, a good fellow? Oh, yes he was.

What was the nature of the oath you took? We were sworn to take arms, to beat an out of land, who would take it to wade knee deep in Orangemen's blood.

What were the Blackfeet? Could not rightly tell, only that they were paid by the government for going about, and finding out things.

Were you sworn to rob? No; but sworn not to rob, or to be for arms. What did you mean by collecting money? Just that we took it from any one that wished to give it.

Joseph Cleary, an approver and accomplice, corroborated Fitzpatrick. He, too, was a young lad, of about twenty; he acknowledged that he was at several robberies of arms; that if the lot fell on him he would have shot Broughill, except that he was afraid of being known, and that the reason Fitzpatrick would not shoot him, was that he was a Nansjail, deposed that when the prisoner, the turkey of Nansjail, deposed that he heard Fitzpatrick who was identifying; that although the lot fell on him he would not shoot the man.

Mr. Corbally submitted that there was nothing to go to the jury but the unsupported testimony of two approvers.

Several persons were called for the defence, to prove an alibi. The Jury found the prisoner guilty, but recommended him to mercy.

His Lordship said, he would forward their recommendation to the Lord Lieutenant, but was sorry that he himself, did not feel bound to second it. He was sentenced to be hanged on the 7th of April.

ON THE EFFECTS OF SOOT AS A MANURE.

FROM THE IRISH FARMER'S AND GARDENER'S MAGAZINE (FOR APRIL). In the month of February, 1829, I had my straw-berry plants dressed, one of which, a border of twenty feet long by two or three feet wide, had for the first year been rather barren, and the plants scarcely. After the dressing, I had sown over it the soil which had been swept from my chimneys...

AGRICULTURE.

ENGLISH MONTHLY REPORT FOR MARCH. March, reversing his ancient characteristic, came in like a lamb, and is going out like a lion. We have had a peck of his dust, and the agriculture of our country is ransomed—as least, thus far, for the weather, during several past weeks, had been most propitious to every operation of agriculture...

The late dry weather must have had a very salutary effect in checking the immoderate growth of the wheat, which, on all rich soils, have exhibited a somewhat alarming appearance of winter pride and rankness, indicating the prospect of a larger crop of straw than of corn. This has induced many farmers to resort to the ancient practice of feeding of the wheat with sheep, and in some parts even with cattle, a practice which we, as drillers especially, could never approve.

REPORT ON THE VALUE OF BONE-MANURE IN COMPARISON WITH ORDINARY FARM-YARD MANURE. By the Hon. Captain W. Ogilvy, Air-Brigade Cavalry. Mr. Watson of Kellor introduced a bill in England, to amend the law relating to the use of bone-manure in Strathmore, having been he began to make experiments with it, to employ it extensively, but I remember well that the great deficiency of farm-yard dung in 1827 (consequent on the almost total failure of the previous year) first induced me to try four acres of turnip without other manure, sown with fifteen bushels of bone-dust per acre, which I obtained from Mr. Watson: it cost 3s. per bushel, or £2 5s. per acre.

Next year, 1828, eight acres were sown with turnips, sown with bone-dust, the soil a light sandy, and the subsoil gravel and sand, coming in some places nearly to the surface, which is very irregular, but in general has a south exposure. This field had been broken up with a crop of oats in 1827; after having been depastured six years principally by sheep. The quantity of bone-dust given was twenty bushels per acre, and cost 2s. 6d. per bushel, or £2 10s. per acre. The turnip crop was so heavy, that, notwithstanding the very light nature of the soil, was judged advisable to pull one-third of the crop, and to feed the two-thirds pulled. The following year, 1829, these eight acres were sown with barley and grass-seeds, and produced a very heavy crop of both, equal in quality to the best in the Dundee market, both in weight and colour.

Having detailed what may be considered a fair experiment during the whole rotation of the above eight acres, I may add that turnip-stalks, as has been mentioned, and fed off with sheep, have become a regular part of the system, and have done well, and, in last year, twenty-two acres were fed off, and in the present year, the same quantity of turnips, and to continue it without injury to the land. Every person in the least acquainted with the management of a farm, of which a considerable proportion consists of light, dry, sandy loam, at a distance from town, manure, must be aware of the importance of this, from knowing the expense at which such land was formerly kept in a fair state of cultivation; indeed, the price of corn for some years past would have been nearly as high, had it not been for the introduction of the necessary manure, and had it not been for the introduction of the necessary manure, and had it not been for the introduction of the necessary manure.

THE EXECUTION OF CHARLES SHAW. The execution of Charles Shaw, who was executed on the 29th inst. at Peterborough, was attended by a large number of persons, and was a most interesting scene. The prisoner, who was a young man, was dressed in a white coat and a white waistcoat, and was surrounded by a large number of soldiers. The execution was performed by a single shot, and the prisoner fell dead on the spot.

THE DEATH OF LORD WILSON. Lord Wilson, who was a distinguished statesman and a member of the House of Commons, died on the 29th inst. at his residence in London. He was a man of high character and ability, and his death is a great loss to the country. He was buried in St. Paul's Cathedral on the 31st inst.
